

While everyone was distracted, they added the COVID injections to the childhood vaccine schedule

No more liability...

Jessica RoseFeb 11

Please refer to my previous [write-up on this subject matter](#), for information on the childhood vaccine schedule of the NHS. I wrote up another article on this subject but I have written so many, I literally can't find it. Help me to find it? :)

Well folks, 'they' voted to put these COVID-19 injections into your babies - including the modified mRNA versions - and what that means is that they are free from liability, exclusive of EUA status, forever. What that means is if your baby gets injured by these as yet experimental modified mRNA COVID shots - that your baby doesn't need: AT ALL - then you are on your own with regard to the product manufacturers being responsible, on any level. This isn't a new story, but it sure is going to be a story that more and more parents share if they do not say no to this insanity.

You can read about this on the [Gateway Pundit's](#) site: [Jim Hoft](#) published this article on February 10, 2023.

THIS IS INSANITY.

Insanity

Unsoundness of mind or lack of the ability to understand that prevents someone from having the mental capacity required by law to enter into a particular relationship, status, or transaction or that releases someone from criminal or civil responsibility.

According to the CDC, your 6-month-old baby needs these COVID modified mRNA injections. Below is just a screenshot of the a much longer list of shots that the CDC claim that your baby needs. Again, HEPB at birth? Isn't that enough for a parent to say HELL NO to *all* of their 'recommendations'?

Vaccine	Birth	1 mo	2 mos	4 mos	6 mos	9 mos	12 mos	15 mos
Hepatitis B ® (HepB)	1 st dose	→ 2 nd dose →				→ 3 rd dose →		
Rotavirus ® (RV) RV1 (2-dose series); RVS (3-dose series)			1 st dose	2 nd dose	See notes			
Diphtheria, tetanus, & acellular pertussis ® (DTaP; <7 yrs)			1 st dose	2 nd dose	3 rd dose			→ 4 th dose →
Haemophilus influenzae type b ® (Hib)			1 st dose	2 nd dose	See notes		→ 3 rd or 4 th dose, See notes →	
Pneumococcal conjugate ® (PCV13, PCV15)			1 st dose	2 nd dose	3 rd dose		→ 4 th dose →	
Inactivated poliovirus ® (IPV; <18 yrs)			1 st dose	2 nd dose	→ 3 rd dose →			
COVID-19 ® (1vCOV-mRNA, 2vCOV-mRNA, 1vCOV-aPS)					2- or 3-dose primary series and booster (See notes)			

Figure 1: Screenshot from <https://www.cdc.gov/vaccines/schedules/hcp/imz/child-adolescent.html>

Again, this means that liability protection is now waived. No one is accountable. No one is going to help you if your baby gets injured or dies. In fact, more often than not, according to my research, if a baby dies of "SIDS", the parents are incriminated by the 'authorities' called in to investigate. Imagine, you lose your baby due to 'other' circumstances, and get accused of killing them. What a tragic societal construct we live in.

Listen, there's not much more to say here than this: from my point of view, if my baby was born healthy, I would breast feed them yummy mummy's milk to promote full-breadth immunity and then **I would let them grow**. I would never inject my baby with exogenous agents that potentially contain all sorts of contaminants and I would certainly never let them be injected at 6 months with an out-of-date product based on novel technologies for a virus that is not a threat to my baby, in the first place.

These mRNA shots, once again, have lamentable safety profiles and were NOT safety tested in infants. There is NO WAY to predict long-term development outcomes and they plan to use the original shot which is far and beyond obsolete. Please talk about this with your friends.

If millions of adults are reporting adverse events - from neurological to cardiovascular issues to death - in temporal proximity to getting these shots, then how in the hell are babies going to fare? They are new. They need time to develop as nature designed *without exogenous injected agents*.

There are 3,610 adverse event reports in VAERS as of February 10, 2023, not including the under reporting factor. Again, it should be taken into account that babies this young have not been 'authorized' to be injected with these products for very long.

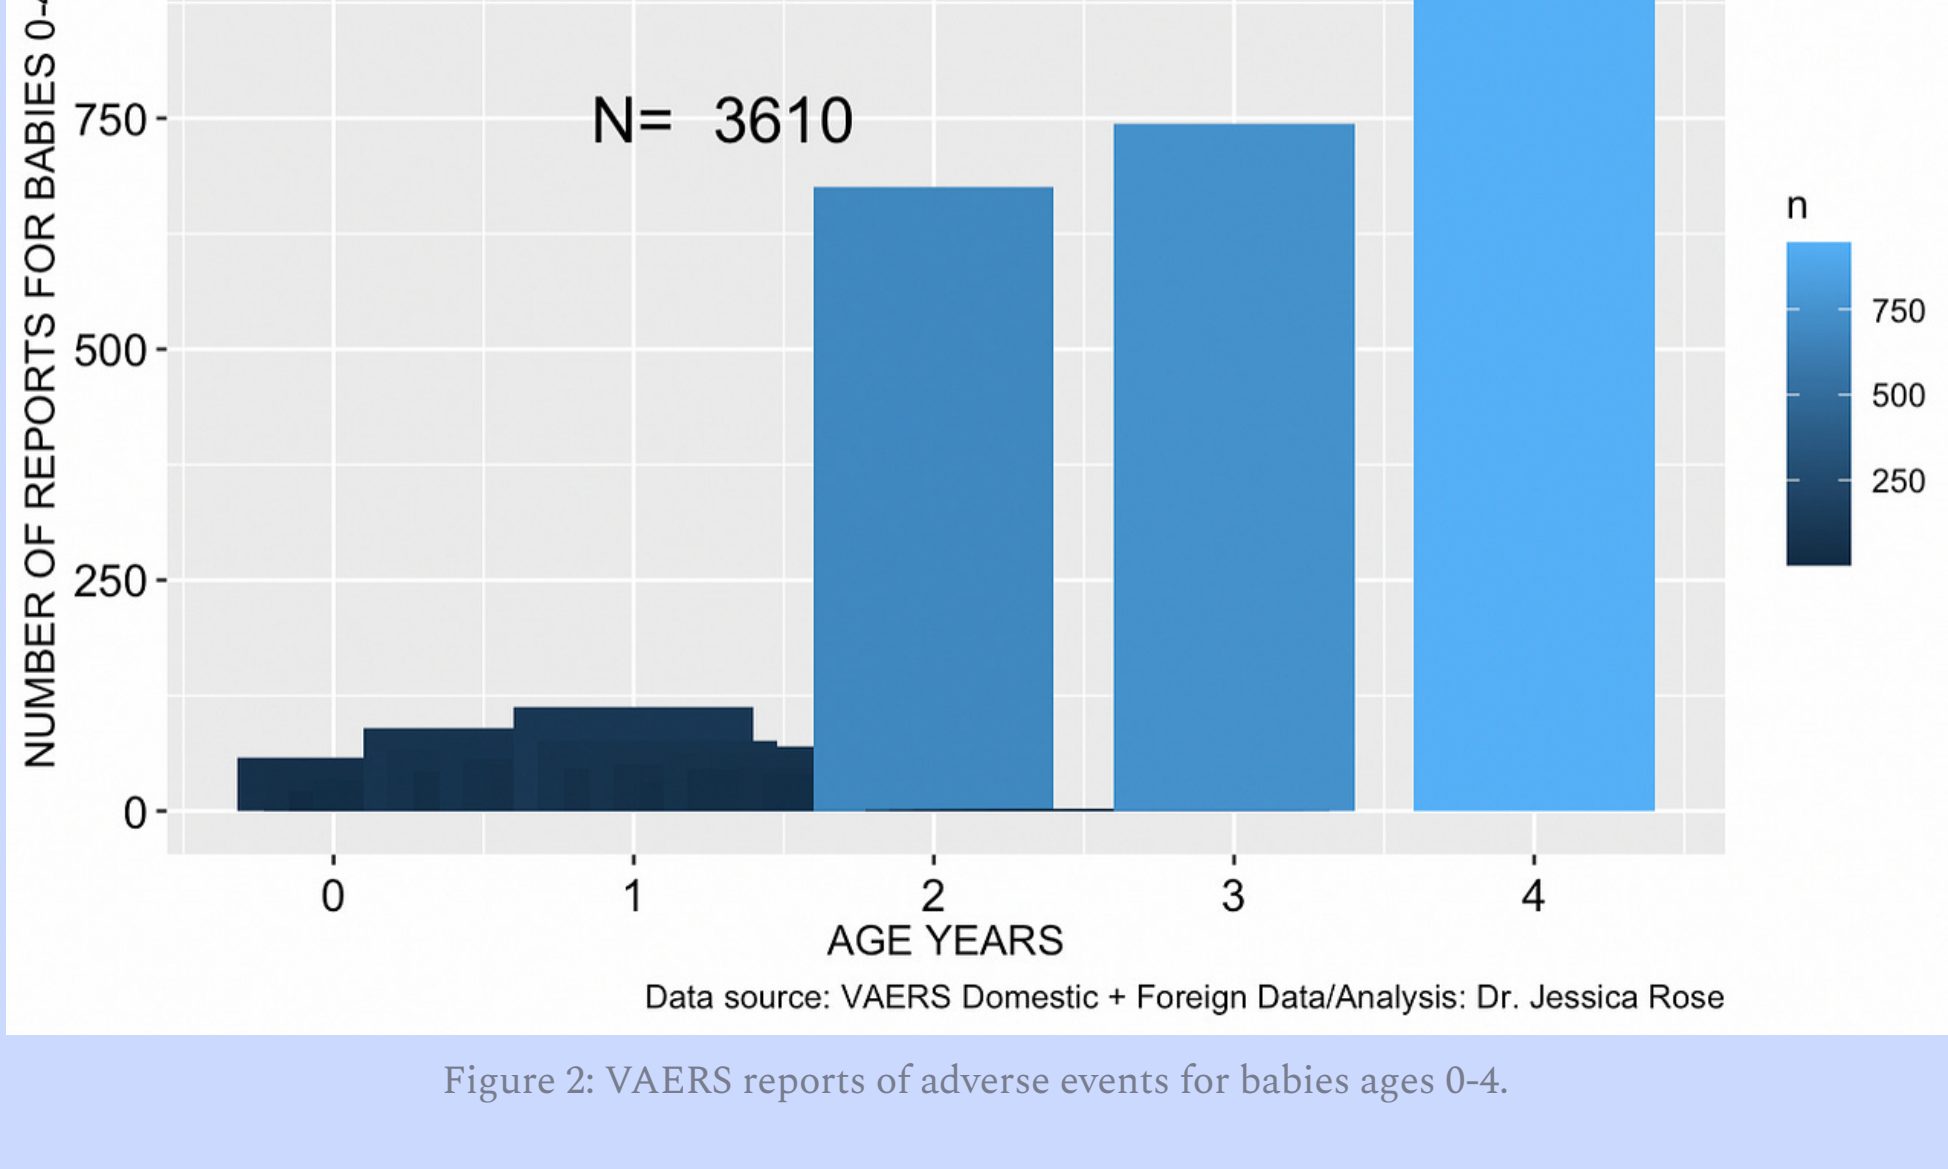

Figure 2: VAERS reports of adverse events for babies ages 0-4.

It might be good news that the number one reported adverse event in the 0-4 years of age category for the COVID shots is "Expired product administered".

Please, assess by intuition and heart whether or not the following chart makes any sense.

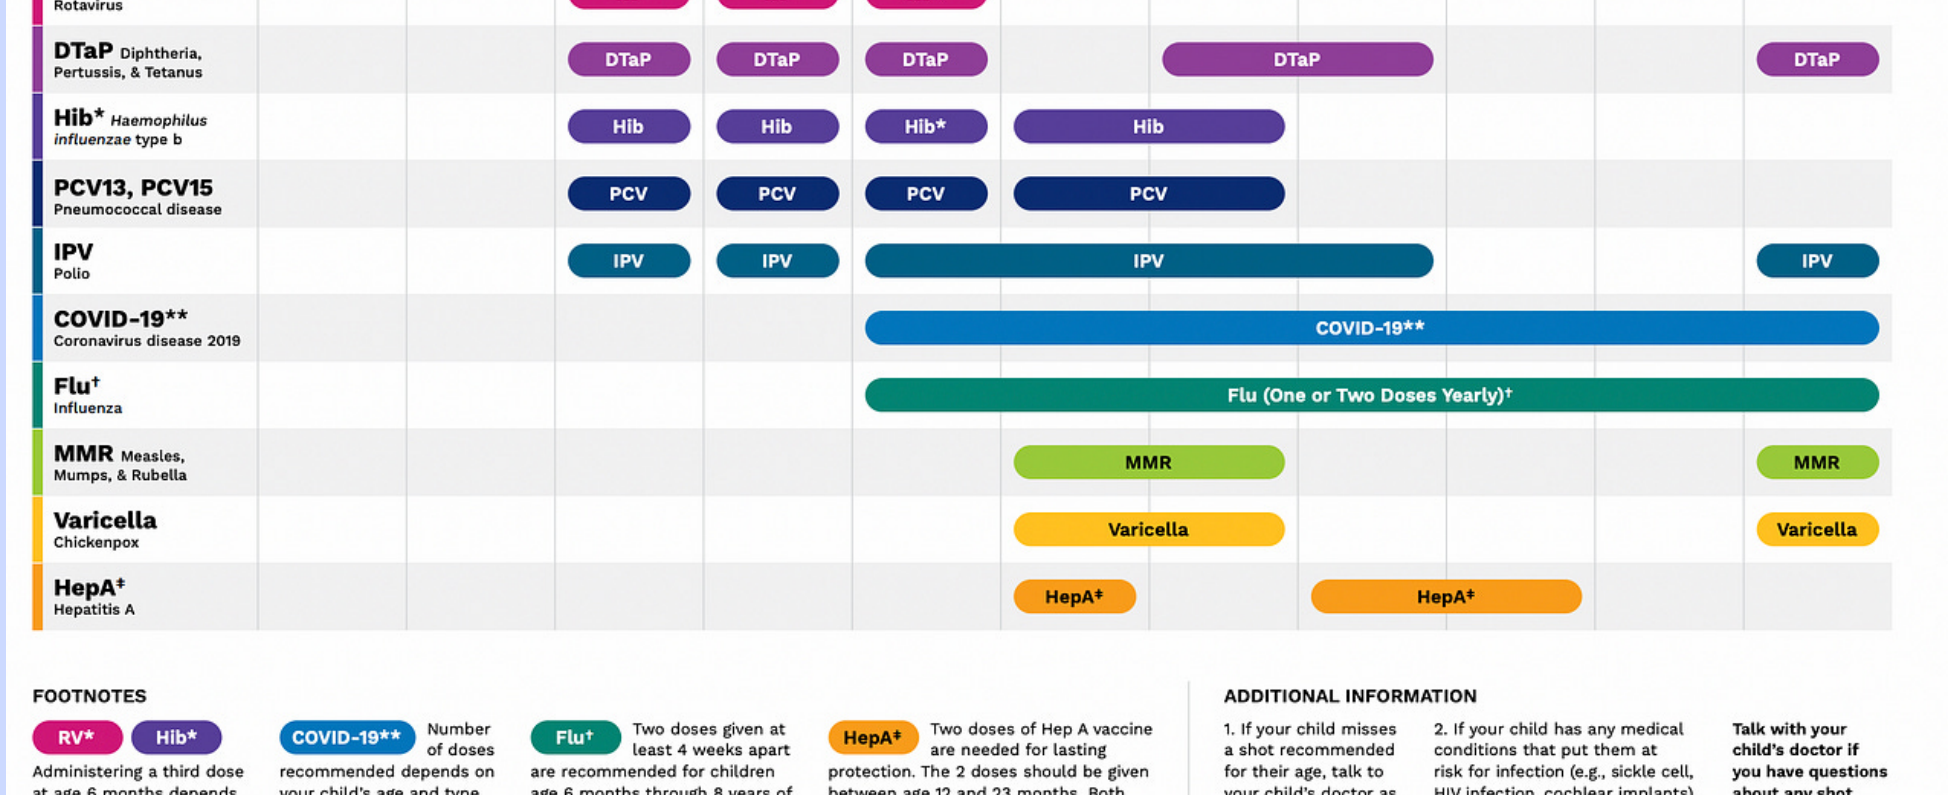

Figure 3: Extracted from <https://www.cdc.gov/vaccines/schedules/easy-to-read/child-easyread.html>

<https://www.cdc.gov/vaccines/parents/downloads/parent-ver-sch-0-6yrs.pdf>

And here is the pre-planned 'Future Product' dosing information for babies ages 0-4 years of age.

Pfizer-BioNTech COVID-19 Vaccine Products			
PRELIMINARY – SUBJECT TO CHANGE PENDING REGULATORY GUIDANCE AND AUTHORIZATION/APPROVAL; CDC DOCUMENT – SHARED FOR JURISDICTIONAL PLANNING PURPOSES ONLY			
Age Indications ^a	Current Products	Future Product	
Vial Cap Color and Label with Color Border	GRAY	ORANGE	MAROON
Preparation	Do Not Dilute	Dilute Before Use	Dilute Before Use
Amount of Diluent Needed per Vial ^b	Do Not Dilute	1.3 mL	2.2 mL
Dose Volume/Dose	0.3 mL/30 mcg	0.2 mL/10 mcg	0.2 mL/2 mcg
Doses per Vial	6 doses per vial	10 doses per vial (after dilution)	10 doses per vial (after dilution)
Storage Conditions			
ULT Freezer (-90°C to -60°C) ^c	12 months	12 months	12 months
Freezer (-25°C to -15°C)	DO NOT STORE	DO NOT STORE	DO NOT STORE
Refrigerator (2°C to 8°C)	10 weeks	10 weeks	10 weeks
Room Temperature (8°C to 25°C)	12 hours prior to first puncture (including any thaw time)	12 hours prior to first puncture (including any thaw time)	12 hours prior to first puncture (including any thaw time)
After First Puncture (2°C to 25°C)	Discard after 12 hours	Discard after 12 hours	Discard after 12 hours

^aUse the appropriate product based on the age of the recipient. ^bUse the diluent (Sterile 0.9% Sodium Chloride Injection, USP) included in the ancillary supply kit. Do not use any other normal saline or diluent. ^cRegardless of storage condition, vaccines should not be used after 12 months from the date of manufacture printed on the vial and cartons. ^dThe vaccine is currently under emergency use authorization review by the Food and Drug Administration (FDA) for children 6 months through 4 years old.

Figure 4: Extracted from Updated 6/22/22 Updated CDC Pediatric COVID-19 Vaccination Operational Planning Guide — Information for the COVID-19 Vaccine for Children 6 Months through 4 Years Old and/or COVID-19 Vaccine for Children 6 Months through 5 Years Old

<https://www.cdc.gov/vaccines/covid-19/downloads/Pfizer-Pediatric-Reference-Planning.pdf>

As a final point, at the recent joint hearing of the [Health Subcommittee and the Oversight and Investigations Subcommittee](#) regarding the federal response to COVID-19, Walensky testified the following:

“I think that we need to recognize [that] the reason that ACIP recommended and CDC put forward getting the COVID-19 vaccine on the pediatric schedule, it was the only way it could be covered in our Vaccines for Children program. It was the only way that our uninsured children would be able to have access to the vaccines. That was the reason to put it on the schedule. It can't be eligible for the Vaccines for Children's program to be available to the underinsured unless it is on that schedule. That was the reason to put it there. Thank you for allowing me to correct that,” said Walensky.

Eh. Wrong. As Jim Hoft correctly states in his article in the [Gateway Pundit](#), “Walensky lied under oath. The Vaccines For Children (VFC) and Childhood Immunization Schedule are two distinct programs.”

They are minting new AntiVaxxers by the thousand. I am a proud AntiVaxxer. I'm a proud anti-hospital, anti-go to the doctor. The last time I went to the doctor, he told me I had the blood pressure of a 15 yr. old. So I must be doing something right....

 This is one of the emails I received the other day. I get hundreds daily, and I am hearing you all.

This particular note spoke loudly to me and this lovely person gave me permission to share her words.
